(Amount in Rs. crore)

Year	NH(O) including Permanent Bridge Fee Fund (PBFF)		Maintenance and Repair	
	Allocation	Release/ Expenditure	Allocation	Release/ Expenditure
2005-06	78.99	66.29	47.66	45.89
2006-07	119.07	106.17	34.58	32.59
2007-08 (upto 31st July, 2007)	103.82	32.584	29.21	10.45

No state-wise fund is allocated by NHAI. In the NHDP works, where contracts have been awarded for 4/6 laning and strengthening of existing NHs, maintenance is carried out by concessionaire/contractor. In other stretches, the expenditure incurred by NHAI, through State PWD, on maintenance of National Highways during last three years is as under:

Year	Amount (Rs. in crore)
2005-06	7.55
2006-07	7.52
2007-08 (upto July, 2007)	5.19

Crisis of safe drinking water

1324. SHRI MANOHAR JOSHI:
SHRI SANJAY RAUT:

Will the Minister of URBAN DEVELOPMENT be pleased to state:

(a) whether the country is facing serious crisis of safe drinking water;

(b) whether Government have formulated any national policy to this effect;

(c) the details of steps taken or proposed to be taken for tackling serious crisis of safe drinking water in the country, particularly in Maharashtra State;

(d) whether Government are considering to change water purification method through Chlorine as it sometimes causes serious health problems in the country; and

(e) the details of healthy and cost effective water purification being used by the developed nations and Government's response/reaction thereto?

THE MINISTER OF STATE IN THE MINISTRY OF URBAN DEVELOPMENT (SHRI AJAY MAKEN): (a) to (c) Supply of drinking water is a State subject. The Ministry has not received any information from the State Governments about serious crisis in availability of safe drinking water in the urban areas of the country.

The drinking water has been assigned first allocation priority in planning & operation of system in the National Water Policy, 2002 announced by the Government of India.

However, in order to improve drinking water supply and mitigate water supply shortage in the urban areas, Govt. of India has launched two new initiatives *i.e.* Urban Infrastructure and Governance and Urban Infrastructure Development Scheme for Small & Medium Towns (UIDSSMT) under Jawaharlal Nehru National Urban Renewal Mission in December, 2005 under which financial assistance is provided to all the State Governments and UT Administration as per guidelines provide infrastructure facilities including water supply. Details of projects approved under these Schemes for State of Maharashtra are given in Statement-I and II respectively (*See* below). Under Accelerated Urban Water Supply Programme (AUWSP) 37 projects were approved for State of Maharashtra and full Central share of Rs. 5789.12 lakh has been released. This scheme has been subsumed in UIDSSMT *w.e.f.* December, 2005.

(d) At present there is no proposal with Government of India to switch over to any other methods of purification/disinfection.

(e) In developing countries, the treated water for domestic consumption is disinfected through chlorination/ozonation/UV radiation process and supplied on continuous basis. Though Ozonation and UV radiation process are effective in disinfecting the water but it is more costly compared to chlorination. Chlorination is safer for intermittent water supply system, which is prevailing in the country. It also helps maintain 'residual effect' as there may be possibility of contamination of water in distribution lines during non-supply hours.

Statement-I

DPRS approved in the water supply sector for Maharashtra under sub-mission for urban infrastructure and governance (JNNURM)
